

Curriculum Vitae

Personal data

Current work address Dipartimento di Matematica e Geoscienze, Università di Trieste, Via Valerio, 12, Trieste.

Contact info + 39 040 558 2647, e-mail: amartinez@units.it

Education

1998 **Ph.D in Mathematics**, *Polytechnic University of Valencia*, Spain.
Title homologated (2018) to the Italian Dottore di Ricerca.

1993 **Laurea Specialistica (MSc.) in Computer Science**, *Polytechnic University of Valencia*, Spain.
Title homologated on July 12 2005 to the italian Laurea Specialistica in Informatica – classe 23/S, by the Università Cà Foscari of Venezia.

Academic positions

June 2019 – **Ricercatore di tipo B**, *Dipartimento di Matematica e Geoscienze, Università di Trieste*.

April 5, 2018 **Abilitazione nazionale a professore di seconda fascia**.

July 2016 – **Ricercatore di tipo A**, *Dipartimento di Matematica "Tullio Levi-Civita", Università di Padova*.
May 2019

2014–2016 **Assegnista di ricerca Senior**, *Università di Padova*.

Low rank updates of preconditioners to accelerate the Inexact Newton's method for the partial eigensolution of large and sparse symmetric positive definite problems.

2005–2006 **Assegnista di ricerca**, *Supervisor: Prof. M. Vianello*, *Università di Padova*.

Parallel computing methods for the implementation of exponential integrators for ODEs/PDEs.

2000–2002 **Postdoctoral Fellow**, *Supervisor: Prof. G. Pini*, *Università di Padova*.

Parallel implementation of Finite Element and Finite Volume codes for the discretization of partial differential equations.

1996–1999 **Assistant Professor**, *Department of Applied Mathematics*, *Polytechnic University of Valencia*.

Research Contracts

I have been awarded the following contracts. Unless otherwise stated they refer to the University of Padua.

2012–2013 **Term contract**, *Supervisor: Prof. M. Putti*, Parallel preconditioners for saddle point and nonlinear systems of equations, 1 Year – Department of Mathematics.

☎ + 39 040 5582647 • ✉ amartinez@units.it

🌐 <https://dmi.units.it/~acalamar>

- 2010 **Research Grant**, *Supervisor: Prof. G. Pini*, PRIN project: Parallel iterative methods for indefinite linear systems arising from the FE discretization of PDE modeling flow and geomechanical coupled models, 5 Months – Department of Mathematical Methods and Models for the Applied Sciences (DMSA).
- 2009–2010 **Research Grant**, *Supervisor: Prof. G. Pini*, PRIN project: Advanced numerical methods and models with applications to fluid mechanics and environmental geomechanics, 1 Year – DMSA.
- 2006 **Research contract**, *Supervisor: Prof. G. Pini*, Parallel preconditioners for iterative solvers of linear systems arising from the discretization of fluid dynamics models, 6 Months – DMSA.
- 2004 **Research contract**, *Supervisor: Prof. G. Pini*, Parallel implementation of iterative methods for flow and transport equations which model infiltration problems in porous media, 1 Month – DMSA.
- 2004 **Research contract**, *Supervisor: Prof. M. Vianello*, Parallel implementation of exponential integrators for ODE/PDE solvers, 2 Months – Department of Mathematics.
- 2004 **Research contract**, *Supervisor: Prof. A. Pietracaprina*, Development of BSP supports on IBM SP/3 parallel machine, 5 Months – Department of Informatics and Engineering.
- 2003 **Research contract**, *Supervisor: Prof. G. Pini*, Parallel implementation of iterative methods for flow and transport equations which model infiltration problems in porous media – 3 Months, DMSA.
- 2003 **Research contract**, *Supervisor: Prof. G. Pini*, Development of approximate inverse based parallel preconditioners for 3D flow and transport codes, 1 Month – DMSA.
- 1993 – 1996 **Research grant**, *Supervisor: Prof. R. Bru*, EC-funded project: *ESPRIT PROJECT 9072–GEPPCOM. Foundations of General Purpose Parallel Computing*, 3 Years – Polytechnic University of Valencia.

Maternity leave

I have taken two maternity leaves: the first one in 1999-2000 and the second one from July 2007 to March 2009. This long gap in my research activity was due to my decision of taking care of my daughter who had a highly preterm birth and was having health problems.

Research Interests

Scientific computing, Numerical Linear Algebra: Sparse Matrix Computations, Iterative Methods, Preconditioning Techniques, Parallel Computing, Matrix Functions. Applications to Computational Fluid Dynamics and Structural Mechanics. My main topic is iterative methods for linear systems solution as well as partial solution of eigenproblems in the hermitian case, with the main emphasis on preconditioning. I have studied, developed and implemented algorithms for solving this kind of problems both in sequential and parallel computing environments.

1. **Cost study and implementation of parallel algorithms for solving linear systems.**
2. **Error analysis of Gaussian elimination and development of new pivoting strategies.**

3. **Parallel preconditioning of large sparse linear systems.**
4. **Parallel preconditioning of CG-like methods for the symmetric eigenvalue problem.**
5. **Quasi-Newton preconditioners for Krylov solvers on the Inexact Newton method.**
6. **Parallelization of meshless methods for solving geomechanical problems.**
7. **Study and parallel implementation of exponential integrators** for the solution of discrete advection diffusion equations.
8. **Study and development of parallel preconditioners for saddle-point problems.**
9. **Preconditioners for the eigensolution of symmetric positive definite matrices of large size.**
10. **Low rank update of preconditioners for sequences of linear systems.**
11. **Preconditioner updates for sequences of linear systems in the Interior Point method for convex optimization problems.**
12. **Efficient computation of RBF and RBF based rational interpolants.**

Project involvement as PI or participant

- 2019-2020 Participation to the GNCS project: "Tecniche innovative e parallele per sistemi lineari e non lineari di grandi dimensioni, funzioni ed equazioni matriciali ed applicazioni".
- 2018-2020 Participation to the project funded by the Spanish University: "Problemas matriciales: computación, teoría y aplicaciones". Coordinator prof. José Mas Marí.
- 2019-2020 Participation to the project *Matrix-Free Preconditioners for Large-Scale Convex Constrained Optimization Problems (PRECOOP)* granted by the CARIPARO foundation in the framework of the "Visiting Programme".
- 2019 Participation to the ISCRA (Italian SuperComputing Resource Allocation) project SCADAMG: "Scalable Adaptive AMG preconditioning for science and engineering"
- 2018 Participation to the ISCRA project UPSCALE: "Updates of scalable preconditioners in geomechanical applications"
- 2018-2019 Participation to the GNCS project: "Metodi numerici per equazioni lineari, non lineari e matriciali con applicazioni".
- 2016–2018 Participation to the BIRD project: "Approximation and Discretization Methods for PDEs on Manifolds for Environmental Modeling".
- 2017-2018 Participation to the GNCS project: Metodi numerici per problemi di ottimizzazione vincolata di grandi dimensioni e applicazioni.
- 2016-2018 Participation to the "Progetto di Ateneo": Stable and efficient discretizations of the mechanics of faults.
- 2015–2016 PI of the ISCRA project PRECISO: Parallel Preconditioners for Iterative Solvers.
- 2013 Participation to the ISCRA project PARPREC: Parallel Preconditioners for Advanced Engineering Applications.
- 2011 Participation to the ISCRA project SPREAD: Scalable PREconditioners for Advanced Discretizations of geomechanical models.
- 2010 Participation to the ISCRA project PARPSEA: PARallel Preconditioners for large Scale Engineering Applications.

- 2008-2010 Participation to the PRIN project: Metodi e modelli numerici avanzati con applicazioni di fluidodinamica e geomeccanica ambientale.
- 2004-2006 Participation to the PRIN project: Modelli numerici per flussi multifase e deformazione del suolo.
- 1998-2001 Participation to the Spanish DGES (Dirección general de educación superior) project “Problemas matriciales de sistemas de ecuaciones lineales y de sistemas de control discretos lineales”.
- 1997-1998 Participation to the Spanish DGES project “Estudio e implementación de algoritmos para la resolución en paralelo de sistemas de ecuaciones”.
- 1996-1997 Participation to the Spanish CICYT (Comisión Interministerial de Ciencia y Tecnología) project “Algoritmos numéricos en paralelo para problemas lineales”.
- 1993-1996 Participation to the EC-funded project: ESPRIT PROJECT 9072–GEPPCOM. Foundations of General Purpose Parallel Computing.

List of Publications

As is common practice in mathematics, the author order is usually alphabetical and does not reflect a difference in contribution.

Preprints

- 2019 [1] L. Bergamaschi, E. Facca, A. Martínez, and M. Putti. “Preconditioners for the Linearized Newton Systems in the Solution of the Discrete Branched Transport Problem” In preparation.
- [2] L. Bergamaschi, J. Marín and A. Martínez, “Preconditioners for inexact-Newton methods based on compact representation of Broyden class updates”. In preparation.
- [3] L. Bergamaschi, J. Gondzio, A. Martínez, J.W. Pearson and S. Pougkakiotis, “Implementing Inexact Interior Point-Proximal Method of Multipliers”. In preparation.

Journal papers

- 2019 [4] A. Martínez, F. Piazzon, A. Sommariva and M. Vianello. “Quadrature-based polynomial optimization”, *Optimization Letters*, published online on March 2019
- [5] S. De Marchi, A. Martínez and E. Perracchione. “Fast and stable rational RBF-based partition of unity interpolation”. *J. Comput. Appl. Math.*, 349:331–343, 2019
- [6] A. Carreño, L. Bergamaschi, A. Martínez, A. Vidal-Ferrándiz, D. Ginestar and G. Verdú “Block preconditioning matrices for the Newton method to compute the λ -modes associated with the neutron diffusion equation”. *Mathematical and Computational Applications*, 24(1):1–14, 2019.
- [7] S. De Marchi, A. Martínez, E. Perracchione and M. Rossini. “RBF-based partition of unity method for elliptic PDEs: Adaptivity and stability issues via Variably Scaled Kernels”. *Journal of Scientific Computing*, 79(1):321–344, 2019.
- [8] L. Bergamaschi, E. Facca, A. Martínez, and M. Putti. “Spectral preconditioners for the efficient numerical solution of a continuous branched transport model”. *J. Comput. Appl. Math.*, 354:259–270 , 2019.
- 2018 [9] L. Bergamaschi, V. De Simone, D. di Serafino, and A. Martínez. “BFGS-like updates of constraint preconditioners for sequences of KKT linear systems”. *Numer. Lin. Alg. Appl.*, 25(5):e2144:1–19, 2018.
- 2017 [10] L. Bergamaschi and A. Martínez. “Two-stage spectral preconditioners for iterative eigensolvers”. *Numer. Lin. Alg. Appl.*, 24(3):1–14, 2017.
- 2016 [11] A. Martínez. “Tuned preconditioners for the eigensolution of large SPD matrices arising in engineering problems”. *Numer. Lin. Alg. Appl.*, 23(3):427–443, 2016.
- 2015 [12] L. Bergamaschi and A. Martínez. “Efficiently preconditioned inexact Newton methods for large symmetric eigenvalue problems”. *Optimization Methods & Software*, 30:301322, 2015

- 2013 [13] L. Bergamaschi and A. Martínez. “Parallel RFSAI-BFGS preconditioners for large symmetric eigenproblems”. *J. Applied Mathematics*, 2013, Article ID 767042, 10 pages.
- [14] L. Bergamaschi, R. Bru, A. Martínez, J. Mas, and M. Putti. “Low-rank update of preconditioners for the nonlinear Richard’s equation”. *Mathematical and Computer Modelling*, 57(7–8):1933–1941, 2013.
- 2012 [15] L. Bergamaschi and A. Martínez. “Banded target matrices and recursive FSAI for parallel preconditioning.” *Numerical Algorithms*, 61(2):223–241, 2012.
- [16] L. Bergamaschi and A. Martínez. “RMCP: Relaxed mixed constraint preconditioners for saddle point linear systems arising in geomechanics”. *Comp. Methods App. Mech. Engrg.*, 221–222:54–62, 2012.
- [17] L. Bergamaschi, A. Martínez, and G. Pini. “Parallel Rayleigh Quotient optimization with FSAI-based preconditioning”. *J. Applied Mathematics*, 2012, Article ID 872901, 14 pages, 2012.
- [18] L. Bergamaschi, R. Bru, A. Martínez, and M. Putti. “Quasi-Newton acceleration of ILU preconditioners for nonlinear two-phase flow equations in porous media”. *Advances in Engineering Software*, 46(1):63–68, 2012.
- 2011 [19] L. Bergamaschi and A. Martínez. “FSAI-based parallel mixed constraint preconditioners for saddle point problems arising in geomechanics”. *J. Comput. Appl. Math.*, 236(3):308–318, 2011.

- 1996 *II International Meeting on Vector and Parallel Processing, Porto (Portugal), September 1996.*
- VII Jornadas de Paralelismo, Santiago de Compostela, Spain, September 1996.*
Title of the talk: **BSP study of different pivoting strategies**

- 1995 *VI Jornadas de Paralelismo, Barcelona, Spain, July 1995.* Title of the talk: **Results of a non-stationary parallel multisplitting method for solving linear systems**
- 1994 *V Jornadas de Paralelismo, Malaga, (Spain), September 1994.*
- 1993 *IV Jornadas de Paralelismo, Santander, (Spain), September 1993.*

Research visits

- 2019 **School of Maths, University of Edinburgh, UK,** *Matrix-Free Preconditioners for Large-Scale Convex Constrained Optimization Problems,* 2 weeks.
- 2018 **Department of Applied Mathematics, UPV, Valencia, Spain,** *Block Preconditioners for the modified block Newton method to compute the λ -modes associated with the neutron diffusion equation.,* 5 days.
- 2018 **Department of Applied Mathematics, UPV, Valencia, Spain,** *Preconditioners for Inexact Newton method based on compact representations of Broyden class updates,* 10 days.
- 2007 **Department of Applied Mathematics, UPV, Valencia, Spain,** *Parallel meshless method for geomechanical problems,* 1 Month.
- 2006 **School of Maths, University of Edinburgh, UK,** *Parallel implementation of exponential integrators for advection diffusion problems,* 5 weeks.
- 1997 **Istituto di Matematica Computazionale, CNR, Pisa,** *Non standard pivoting strategies for Gaussian elimination in parallel,* 3 Months.
- 1996 **Istituto di Matematica Computazionale, CNR, Pisa,** *Average error analysis of Gaussian Elimination,* 2 Months.
- 1995 **Istituto di Matematica Computazionale, CNR, Pisa,** *Efficient Matrix vector product on supercomputers,* 2 Months.
- 1994 **Istituto di Elaborazione dell'Informazione, CNR, Pisa,** *Communication algorithms on fat-trees based interconnection networks,* 2 Months.

Conference organization

I have taken active part in the organizing committee of the following schools/workshops:

- 2020 Workshop: Numerical Linear Algebra for PDEs and Large Scale Optimization, Padova, February 17–18
- 2019 Miniworkshop within the ICIAM Conference held in Valencia: Preconditioners for Linear Algebra Methods in Large Scale Scientific Computing.
Workshop: Advances in Linear Algebra and Huge-Scale Optimization, Edinburgh, July 1–2
- 2018 Program Chair of Topic: Parallel Numerical Methods and Applications for the *Euro-Par 2018 24th International European Conference on Parallel and Distributed Computing,* Turin, 27th-31st Aug. 2018
- 2018 Workshop Seminari Padovani di Analisi Numerica (SPAN 2018), Padova, May 3–4, 2018.
- 2018 Workshop Due giorni di Algebra Lineare Numerica e Applicazioni, Padova, February 8–9, 2018.

- 2017 Minisymposium: Linear Algebra for Large Scale Scientific Computing. 17th CMMSE conference, Cadiz, Spain, July 2017.
- 1995 Workshop of the ESPRIT PROJECT 9072–GEPPCOM (Foundations of General Purpose Parallel Computing), held in Peñíscola (Spain) from November 27 to December 2, 1995.
- 1994 International Summer school: *Parallel Numerical Algorithms* in the framework of the project: ESPRIT PROJECT 9072–GEPPCOM. Location: Peñíscola (Spain) from May 30 to June 3, 1994.

Member of Editorial Boards

- 2018 Guest Editor of the Special Issue of Vol.12 (2019) of the journal *Dolomites Research Notes on Approximation*: Proceedings of the Workshop SPAN 2018

Reviewer Activity

I have acted as a reviewer for the following International Journals:

Journal of Supercomputing
 Applied Numerical Mathematics
 International Journal of Computer Mathematics

Other formation courses

- 1995 *Exemplar SPP: programming enviroment*. Organized by Convex Supercomputer S. A. E. Held at the central computer center of the Polytechnic University of Valencia (30 hours).
- Advances in Software Tools and Applications for Multiprocessor Systems*. COMETT course held at the Barcelona Supercomputing center on 10–12 May, 1995.

Bibliometrics

Complete statistics of my publications on relevant databases: ISI Web of Knowledge (ISI WoS), MathSciNet, Scopus. Last updated on September 24, 2019.

ISI WoS	MathSciNet	Scopus	
31	24	34	publications
197	85	209	citations
6.4	3.5	6.1	average citation count per article
8	6	8	h-index

Computer skills

Basic HTML, OpenOffice
 Intermediate L^AT_EX, Linux, C programming language
 Advanced Fortran 90, Matlab, MPI
 Vast experience in writing programs for parallel computing systems

Languages

Spanish Mother tongue

Italian Excellent
English Good

Teaching Activities

Unless otherwise stated teaching activity is at the Faculty of Engineering, University of Padova, for undergraduate students.

University of Trieste (Courses to be delivered in the period March–June 2020)

- 2019-20 *Advanced Numerical Analysis*, Master Degree in Data Sciences and Scientific Computing. **(Titolare, 48 ore)**
Analisi Numerica in Industrial Engineering. **(24 ore)**

University of Edinburgh, School of Maths.

- Feb 2019 PhD Course: Iterative Methods and Preconditioning **(8 ore)**

University of Padua

- 2018-19 *Calcolo Numerico* in Mathematics, Faculty of Sciences. **(Titolare, 56 ore)**
Calcolo Numerico (LAB) in Computer Science, Faculty of Sciences. **(16 ore)**
Calcolo Numerico. Summer course (Bressanone, BZ) in Industrial and Civil Engineering. **(8 ore)**
- 2017-18 *Calcolo Numerico* in Mathematics, Faculty of Sciences. **(Titolare, 32 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(24 ore)**
Calcolo Numerico. Summer course (Bressanone, BZ) in Industrial and Civil Engineering. **(8 ore)**
- 2016-17 *Calcolo Numerico (LAB)* in Mathematics, Faculty of Sciences. **(16 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(24 ore)**
Calcolo Numerico (LAB) in Environmental Engineering. **(16 ore)**
Calcolo Numerico. Summer course (Bressanone, BZ) in Industrial and Civil Engineering. **(10 ore)**
- 2015-16 *Calcolo Numerico (LAB)* in Mathematics, Faculty of Sciences. **(16 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(36 ore)**
Calcolo Numerico. Summer course (Bressanone, BZ) in Industrial and Civil Engineering. **(10 ore)**
- 2014-15 *Calcolo Numerico (LAB)* in Mathematics, Faculty of Sciences. **(14 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(36 ore)**
- 2013-14 *Matematica*, in "Tecnologie Forestali e Ambientali", Faculty of Agriculture. **(Titolare, 64 ore)**
Calcolo Numerico (LAB) in Mathematics, Faculty of Sciences. **(16 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(36 ore)**
- 2012–13 *Calcolo Numerico* in Industrial Engineering. **(32 ore)**
Calcolo Numerico (LAB) in Industrial Engineering. **(42 ore)**

- Calcolo Numerico (LAB)* in Mathematics, Faculty of Sciences. **(16 ore)**
Matematica, in “Riassetto del territorio e tutela del paesaggio”, Faculty of Agriculture. **(20 ore)**
- 2011–12 *Calcolo Numerico* in Informatics, Faculty of Sciences. **(Titolare, 64 ore)**
Calcolo Numerico in Industrial Engineering. **(32 ore)**
Calcolo Numerico (LAB) in Civil Engineering. **(36 ore)**
- 2010–11 *Calcolo Numerico (LAB)* in Civil Engineering. **(26 ore)**
- 2009–10 *Calcolo Numerico (LAB)* in Civil Engineering. **(26 ore)**
Elementi di Algebra lineare e Geometria. in Architectural Engineering. **(26 ore)**
- 2006–07 *Calcolo Numerico (LAB)* in Architectural Engineering. **(Esercitazioni, 18 ore)**
- 2003–04 *Matematica*, in “Tecnologie Forestali e Ambientali”, Faculty of Agriculture. **(Esercitazioni, 40 ore)**

Polytechnic University of Valencia

- 2017–18 *Iterative Methods for Sparse Linear systems*, Master in Mathematical research, **(12 ore)**
- 1998–99 *Linear Algebra*, Escuela Técnica Superior de Ingenieros de Caminos, Canales y Puertos **(Titolare, corso di durata annuale)**
- 1997–98 *Linear Algebra*, Escuela Técnica Superior de Ingenieros de Caminos, Canales y Puertos. **(Titolare, corso di durata annuale)**
- 1996–97 *Linear Algebra*, Escuela Técnica Superior de Ingenieros de Caminos, Canales y Puertos. **(Titolare, corso di durata annuale)**
- 1995–96 *Computer science (Laboratorio)*, for Agricultural Engineering students. (12 ore)

Thesis supervision

Supervisor of the following BSc thesis (Mathematical degree):

- 2018-19 *Low rank preconditioner updates for sequences of linear systems arising from an optimal transport problem*, candidate: Claudia Cozzolino.

Co-supervisor of the following BSc theses (Mathematical degree):

- 2017-18 *Estrazione incrementale di informazioni spettrali e deflazione nella soluzione iterativa di successioni di sistemi lineari*, candidate: Stefania Colpo.
- 2016-17 *Impiego di informazioni spettrali per la soluzione iterativa di successioni di sistemi lineari*, candidate: Bryan Emmit Mack.

Padova, September 24, 2019

Ángeles Martínez Calomardo
