

LIST OF SCIENTIFIC PUBBLICATIONS

of
Giorgio Pini

March 2009

PAPERS IN INTERNATIONAL JOURNALS

- [1] Pini, G. and G. Zilli. FEMBOUS a finite element code for the solution of the Boussinesq equation. *Advances in Engineering Software*, 6(2):116–117, 1983.
- [2] Galeati, G., Rossi, G., Pini, G., and G. Zilli. Optimization of a snow network by multivariate statistical analysis. *Hydrological Science Journal*, 31:93–108, 1986.
- [3] Gambolati, G., Pini, G., and T. Tucciarelli. A 3-D finite element conjugate gradient model of subsurface flow with automatic mesh generation. *Advances in Water Resources*, 9:34–41, 1986.
- [4] Gambolati, G., Pini, G., and F. Sartoretto. Solution to large symmetric eigenproblems by an accelerated conjugate gradient technique. *Environmental Software*, 1(1):31–39, 1986.
- [5] Gambolati, G., Pini, G., and F. Sartoretto. An improved iterative optimization technique for the leftmost eigenpairs of large symmetric matrices. *Journal of Computational Physics*, 74:41–60, 1988.
- [6] Gambolati, G., Pini, G., and G. Zilli. Numerical comparison of preconditionings for large sparse finite element problems. *Numerical Methods for Partial Differential Equations*, 4:139–157, 1988.
- [7] Sartoretto, F., Pini, G., and G. Gambolati. Accelerated simultaneous iterations for large finite element eigenproblems. *Journal of Computational Physics*, 81:53–69, 1989.
- [8] Pini, G. and G. Zilli. Preconditioned iterative algorithms for large sparse unsymmetric problems. *Numerical Methods for Partial Differential Equations*, 5:107–120, 1989.

- [9] Pini, G., Gambolati, G., and G. Galeati. 3-D finite element transport models by upwind preconditioned conjugate gradients. *Advances in Water Resources*, 12:54–58, 1989.
- [10] Gambolati, G., Pini, G., and G. Verri. Simulation of regional subsurface flow by finite element models. *Advances in Water Resources*, 12:59–65, 1989.
- [11] Pini, G. and G. Zilli. On vectorizing the preconditioned generalized conjugate residual methods. *International Journal of Computer Mathematics*, 33:195–207, 1990.
- [12] Pini, G. and G. Gambolati. Is a simple diagonal scaling the best preconditioner for conjugate gradients on supercomputers? *Advances in Water Resources*, 13:147–153, 1990.
- [13] Pini, G. Computation of minimum eigenvalue through minimization of Rayleigh’s quotient for large sparse matrices using vector computer. *International Journal of Computer Mathematics*, 36:89–99, 1990.
- [14] Pini, G. Prismatic versus tetrahedral elements in three-dimensional finite element analyses of subsurface systems. *Numerical Methods for Partial Differential Equations*, 1:25–41, 1991.
- [15] Pini, G. A parallel algorithm for the partial eigensolution of sparse symmetric matrices on the CRAY Y-MP. *Parallel Computing*, 17:553–561, 1991.
- [16] Pini, G. and F. Sartoretto. Vector and parallel codes for large sparse eigenproblems. *Supercomputer*, 50:29-39, 1992.
- [17] Pini, G. Domain decomposition and nested grids in a parallel environment. *Supercomputer*, 50:22-28, 1992.
- [18] Pini, G. Parallel evaluation of leftmost eigenpairs of large unsymmetric matrices. *Numerical Methods for Partial Differential Equations*, 10:533-544, 1994.

- [19] Bergamaschi, L., Gambolati, G., and G. Pini. Spectral analysis of large finite element problems by optimization methods. *Journal Shock and Vibration*, 1(6):529-540, 1994.
- [20] Pini, G. Transpose-free Lanczos-type schemes on transputer network. *Journal Parallel Algorithms and Applications*, 3:249-260, 1994.
- [21] Pini, G. Calculation of condition numbers of sparse matrices on the nCUBE 2. *Supercomputer*, 59, XI-1:41-48, 1994/1995.
- [22] Gambolati, G., Pini, G., and M. Putti. Nested iterations for symmetric eigenproblems. *SIAM Journal on Scientific Computing*, 16(1):173-191, 1995.
- [23] Bergamaschi, L. Gambolati, G., Pini, G., and M. Putti. Gradient eigenanalysis on nested finite elements. *Adv. Eng. Software*, 27:155-165, 1996.
- [24] Bergamaschi, L., Gambolati, G., and G. Pini. Asymptotic convergence of conjugate gradient methods for the partial symmetric eigenproblem. *Numerical Linear Algebra with Applications*, 4(2):69-84, 1997.
- [25] Pini, G. and P. Teatini. Parallel block iterative method for multiaquifer flow models. *Numerical Methods for Partial Differential Equations*, 13:39-50, 1997.
- [26] Pini, G. and M. Putti. Parallel finite element Laplace transform method for the non-equilibrium groundwater transport equation. *International Journal for Numerical Methods in Engineering*, 40:2653-2664, 1997.
- [27] Pini, G. and F. Sartoretto. Iterative solution of block tridiagonal systems on the Cray T3D and T3E supercomputers. *Supercomputer*, 69 XIII-3/4:67-81, 1997.
- [28] Gambolati, G. and G. Pini. Complex solution to nonideal contaminant transport through porous media. *Journal of Computational Physics*, 145:538-554, 1998.

- [29] Gambolati, G. and G. Pini. A numerical eigenvalue study of preconditioned non-equilibrium transport equations. *International Journal for Numerical Methods in Fluids*, 29:343-361, 1999.
- [30] Pini, G and F. Sartoretto. A parallel finite element code for nonlinear leaky aquifer systems. *Journal Parallel Algorithms and Applications*, 13: 345-361, 1999.

TECHNICAL REPORTS

- [115] Pini, G. and G. Zilli. Un codice agli elementi finiti per l'equazione non lineare di Dupuit-Boussinesq. (*Rapporto 3.83*), C.N.R., Progetto Finalizzato SOFTMAT, 1983.
- [116] Gambolati, G. and G. Pini. Modello agli elementi finiti per l'analisi delle risorse idriche della regione Friuli Venezia-Giulia, 2. Risoluzione del modello col metodo degli elementi finiti. (*Rapporto Tecnico*), Ist. Matematica Applicata, Università di Padova, 1985.
- [117] Gambolati, G. and G. Pini. Modello agli elementi finiti per l'analisi delle risorse idriche della regione Friuli Venezia-Giulia, 3. Simulazioni numeriche regionali. (*Rapporto Tecnico*), Ist. Matematica Applicata, Università di Padova, 1986.

- [118] Gambolati, G. and G. Pini. Studio per l'impostazione e l'elaborazione di un modello 3-D agli elementi finiti per l'intrusione del cuneo salino in acquiferi costieri. Parte 1: Modello Matematico. (*Rapporto Tecnico*), Dip. Metodi e Modelli Matematici per le Scienze Applicate, Università di Padova, Dicembre 1989,
- [119] Gambolati, G., Pini, G., Putti, M., and F. Sartoretto. Studio per l'impostazione e l'elaborazione di un modello 3-D agli elementi finiti per l'intrusione del cuneo salino in acquiferi costieri. Parte 2: Risoluzione e calibratura del modello. (*Rapporto Tecnico*), Dip. di Metodi e Modelli Matematici per le Scienze Applicate, Università di Padova, Marzo 1990.
- [120] Gambolati, G., Pini, G., and M. Putti. Studio per l'impostazione e l'elaborazione di un modello 3-D agli elementi finiti per l'intrusione del cuneo salino in acquiferi costieri. Nota tecnica e Rapporto finale: Modello insaturo. (*Rapporto Tecnico*), Dip. di Metodi e Modelli Matematici per le Scienze Applicate, Università di Padova, Marzo 1991.
- [121] Gambolati, G., Pini, G., and G. Zilli. Codici vettoriali per la soluzione di sistemi sparsi con metodi iterativi della classe gradiente coniugato. *CNR - Collana del Progetto Finalizzato Sistemi Informatici e Calcolo Parallelo, Sottoprogetto 1: Calcolo Scientifico per grandi sistemi*, (*Rapporto Tecnico 1/51*), Febbraio 1991.
- [122] Gambolati, G., Pini, G., Putti, M., and C. Paniconi. Codici 2-D e 3-D agli elementi finiti per la dispersione ed il trasporto di polveri di carbone in terreni saturi ed insaturi. Relazione Tecnica Finale : Modelli 2-D LEA e non-LEA. (*Rapporto Tecnico*), Dip. di Metodi e Modelli Matematici per le Scienze Applicate, Università di Padova, Gennaio 1993.
- [123] Bergamaschi, L., Gambolati, G., and G. Pini. Convergence Analysis of Conjugate Gradient Methods for the Partial Symmetric Eigenproblem, (*Rapporto Tecnico n. 52*) Dip. di Metodi e Modelli Matematici per le Scienze Applicate, Università di Padova, Febbraio 1996.
